

Dependable Surface Protection Films

newtown

O Over 40 years' experience in the supply and conversion of surface protection films.

“

Newtown's mission is to provide your business with the most suitable surface protection films to preserve the value of both your products and brand. With our state of the art on-site conversion facilities, we can produce any roll of film in any width or length to your exact specification. We specialise in the protection of plastic, coated metals, uncoated metals and glass substrates, ensuring no damage is caused to your materials in the various stages of your manufacturing, storage and distribution process. Eliminate your non-quality costs with surface protection films that you can depend on. ”

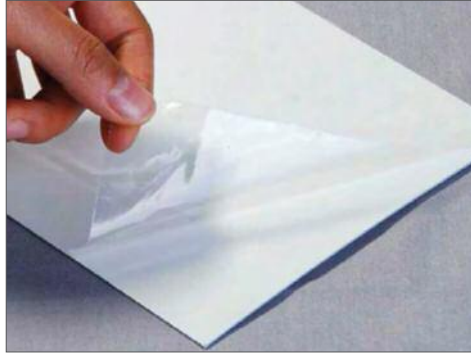

Luke Verrall
Newtown Managing Director

Plastics

Newtown supplies protection films for plastic protection applications such as PVC profiles and PC or PVC sheets. Our films offer a high tack adhesive to prevent the film from lifting during profile cutting and processing.

- Various thicknesses of films
- Any width /length of rolls
- Wide range of colours
- Printed film options
- UV stable

Coated Metals

Newtown supplies protection films for coated metals such as powder coated, painted, chrome plated and anodised surfaces. We serve a range of industries such as architectural fabricators, window/door frame fabricators and the automotive industry where coated surfaces need to remain flawless.

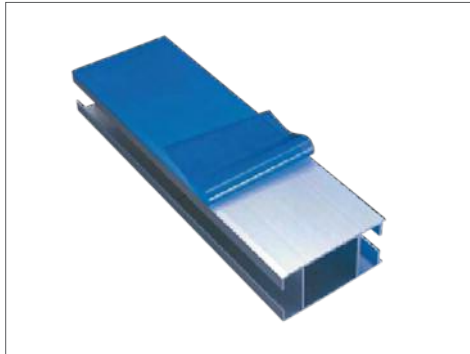

- Various thicknesses of films
- Any width / length of rolls
- Wide range of colours
- Printed film options
- UV stable

Uncoated Metals

Newtown supplies protection films for uncoated metals such as aluminium, steel, stainless steel and mill finished surfaces. Whether it's a rough or mirror polished finish, processing presents no obstacles as our films can stand up to the demands of today's high output automated manufacturing.

- Various thicknesses of films
- Any width /length of rolls
- Wide range of colours
- Printed film options
- UV stable

Glass

Newtown supplies protection films for all glass applications, popular industries we supply into are the architectural fabrication, glazing and automotive industry. Many of our films can be applied for several months and can stand up to high demand applications where weather resistance performance is required.

- Various thicknesses of films
- Any width / length of rolls
- Wide range of colours
- Printed film options
- UV stable
