The Packaging Experts

Industries we specialise in are:

Automotive

Print/POS

Construction

Industrial

Furnishings

Retail

Welcome to Newtown

Everything we do is about being focused on customer needs. Our promise to you is that we will deliver #EpicService in every aspect of our work as your packaging partner. We have worked with a wide variety of industries since 1977 to establish a reputation as being honest, reliable, quality driven and motivated to exceed your expectations.

Expert product knowledge

We know what every single product can be used for, what they can't be used for and have even learned of strange applications – useful for thinking outside the box. Our sales, marketing and purchasing teams have regular product training both in-house and on manufacturer operated courses.

We understand our customers

Our sales team work hard to understand what our customers require, what they value and how their needs are changing. Whether that is delivery, price, performance or a combination of factors, we will do our very best to accommodate your requirements.

Nationwide coverage

With our excellent warehousing facilities, IT systems and our very own fleet of vehicles, we have the infrastructure in place to service your requirements. Local clients can benefit from our same day delivery service or if you're further afield we can arrange next day parcel or pallet services.

We convert and manufacture

We have in-house conversion and manufacturing machinery that allows us to supply cardboard boxes and adhesive tapes to your exact measurements. Custom printed tapes and cardboard box services are available on a small or large scale.

We look forward to hearing from you

1 Self Adhesive Tapes

- Buff, Clear & N Tapes 6-7
- Printed Packaging Tapes 8-9
- Recyclable/Paper Packaging Tapes 10-11
- Single Sided Tapes 12
- Fingerlift Double Sided Tapes 13
- Double Sided Tapes Thin & Thick Bond 14-15
- Magnetic Tapes 16
- Bobbins & Machine Length Tapes 17
- Low Tack Protection Films 18-19

Buff, Clear & N Tapes

Buff or Clear packaging tape is suitable for sealing cardboard boxes. Our rolls are supplied in 48mm or 72mm widths on a standard 75mm core size.

Packaging tapes are an essential component in most industries, ranging from box sealing to bundling.

Economy Range

A polypropylene tape, with a high tack water based acrylic adhesive.

Mid Range

The most popular packaging tape is our polypropylene with a premium hot melt or solvent adhesive, giving flexibility in most applications, including cold temperatures.

Low Noise Range

A high quality low noise polypropylene tape that unwinds silently with an aggressive solvent adhesive.

Premium Packaging Tape

Vinyl packaging tape is the highest grade of packaging tape and is the most conformable. It unwinds silently and is hand tearable, with a strong solvent adhesive.

Key product features/benefits:

- Cost effective
- Quick & easy
- Durable
- Good adhesion to most surfaces
- Versatile

Benefits of N-Tape:

- Less dispenser roll changes
- Takes up less storage space
- Reduces your packaging waste

FREE tape dispenser with every N-Tape order
* Terms Apply

Printed Packaging Tapes

Printed tapes are a cost effective way to get your message across and to promote your brand or product.

We print tapes here at Newtown; that means you are dealing directly with the manufacturer so whether you need a small quantity or 10,000 rolls, we can help.

Key product features/benefits:

- Printed to your specification
- Available in a range of widths and lengths
- Up to 4 colour print available
- Short runs starting at just 144 rolls

	Custom Printed PP Hot Melt Tape 48mm x 66m 1 Colour	Roll	4 Cases – 144 Rolls
	Custom Printed PP Hot Melt Tape 48mm x 66m 2 Colour	Roll	4 Cases – 144 Rolls
	Custom Printed PP Hot Melt Tape 48mm x 66m 3 Colour	Roll	4 Cases – 144 Rolls
Premium Grade - Solvent adhesive, PVC film, slow release, quiet			
	Custom Printed PVC Solvent Tape 48mm x 66m 1 Colour	Roll	4 Cases – 144 Rolls
	Custom Printed PVC Solvent Tape 48mm x 66m 2 Colour	Roll	4 Cases – 144 Rolls
	Custom Printed PVC Solvent Tape 48mm x 66m 3 Colour	Roll	4 Cases – 144 Rolls

Top Tip:

Consider a 75mm logo tape - that way you will be less tempted to apply two strips, which looks messy and you'll save money too!.

> *"Get your message across in a cost effective way and enhance your brand image"*

How do I order custom printed tape?

1. Decide on the Size
Standard sizes are 48mm and 75mm, but other widths are available. Standard lengths are 66m, 132m and 990m. We will pro rata for sizes.

2. Decide on how many Colours
We can surface print up to 3 colours on white, buff or clear tape. Reverse out printing is also on option. We will be able to match any specific pantone references.

3. Choose the Material
The options are Polypropylene, Low Noise Polypropylene or PVC Vinyl. Please ask the sales team if you need advice on the choice.

4. Decide on the Quantity
The minimum is usually 144 rolls, although savings can be made with larger runs. Contact our Sales Team and they will be happy to advise you through the process.

Recyclable/Paper Packaging Tapes

Self adhesive paper tape range

Self adhesive paper tape requires no wetting before application, it is ready to use off the roll due to its high strength adhesive backing.
A great alternative to traditional packaging tapes with environmental benefits.

STOCK CODE	DESCRIPTION	UNIT OF SALE	MIN. ORDER QTY
Self Adhesive Paper Tape			
NP1133.72–38	S/A Paper Tape 38mm x 50m	Roll	1 Case – 48 Rolls
NP1133.48–48	S/A Paper Tape 48mm x 50m	Roll	1 Case – 36 Rolls
NP1133.72–72	S/A Paper Tape 72mm x 50m	Roll	1 Case – 24 Rolls

Key product features/benefits:

- Strong resistance to humidity and moisture
- Tamper evidence – cannot be removed from a carton without leaving visible evidence
- Recyclable and the tapes are made from 100% recyclable materials
- Fast - no need for wetting - apply just like normal packaging tape

Application/Uses:

- Sealing cardboard boxes
- Cardboard repair

Printed paper tapes available

Gummed paper tape range

Gummed paper tape is an environmentally friendly option for sealing cardboard boxes. The adhesive backing needs to be water activated before application.

100% RECYCLABLE

- Single OR paired pieces
- Low min, order quantity
- Length...that's up to you!

*All bespoke orders carry a +/- 10% production tolerance.

Bobbins & Machine Length Tapes

The Tape-EZ™ Range of tapes have been designed to provide optimum up time for automated and semi-automated tape application systems, such as our Fuze, Enimac, and Fuze-Ecomm ranges.

Carefully selected adhesives, carriers and lengths ensure that you stay productive for as long as possible by changing rolls less frequently and confident of a strong bond.

Low Tack Protection Tapes

Low tack protection tapes are a great way to protect surfaces. The range includes tapes suitable for protecting powder coated metals, plastics, bare metals, glass, carpets, screens and more. As quality of finished surfaces has increased, so has the requirement to protect them. Our conversion abilities mean that we can produce your exact widths. We also have the ability to create specialist die cut parts.

"Need help choosing a suitable protection film? Call 01527 517 517 to speak to one of our technical experts for advice and support."

Cardboard Boxes

How do I choose a box?

Choosing the most suitable cardboard box for your requirements can appear to be a daunting task! The below information and following pages will demonstrate some of the options available to you. Do not hesitate to give us a call or email to speak to our technical sales team for assistance or advice.

Measuring a box

All box measurements are based on the internal dimensions. We need to know the Length (L), Width (W) and Height (H) of the box in millimetres (mm) to ensure your boxes are made to the correct size.

Choosing a box style

Boxes come in many styles and usually carry a style code, for example '0201'. These style codes are called 'FEFCO' styles. We split our FEFCO styles into 'Standard Boxes' and 'Die Cut Boxes'. We can however also create completely bespoke designs too!

Single wall or double wall

The walls of a cardboard box come in a variety of thicknesses: single wall, double wall and triple wall. A thicker wall increases the strength and protection offered by a box. Our technical sales team will recommend a wall thickness based on the weight of your products.

Plain, printed or with fitments

As standard we offer our boxes in plain brown or white. We also offer the option to have your boxes printed with a variety of different print options (see page 45). If you need a fitment inside your box to hold your product(s) we can create these too (see page 44).

Standard boxes range

Standard box styles manufactured to any size

Standard cardboard boxes come in a range of styles with the '0201' style being universally the most popular manufactured box of all time. Standard box styles are cost effective, quick to manufacture and can be produced to any size or quantity.

Key product features/benefits:

- Cost effective
- Wide range of styles
- Any size or quantity
- Versatile
- Fast turnaround

Pallet Box

Die cut boxes range

Boxes for more complex packaging

Die cut boxes are the solution to more complex packaging problems which can't be solved with a standard box. They are manufactured by being stamped out of corrugated board so more complex designs can be created. For example, certain types of die cut box can eliminate the need for tape to seal a box by creating interlocking flaps, resulting in a better first impression to your customer.

Key product features/benefits:

- Aesthetically pleasing
- Wide range of styles
- Any size or quantity
- Easy to construct
- Less tape for sealing

ISTA Testing / Stakker

Packaging design & ISTA® testing

Newtown can provide you with proven packaging solutions that are designed around you. For nearly 40 years we have provided solutions and value analysis for clients to indentify the most cost effective way to protect your products.

ISTA® testing

If required we can also submit our solution to be tested to ISTA® (International Safe Transit Association) guidelines, which will ensure that in standard conditions your product will arrive in pristine condition.

Packaging analysis

It is a good idea to consider a packaging analysis if you are experiencing customer complaints due to damaged goods or are using a supplier who has a 'we've always done it this way' mentality. It is also worth considering even if you have been through a tender process, as often the packaging item cost does not translate into pack costs benefits.

STAKKER® roll securing product range

STAKKERS® are a new way to maximise the safety and efficiency for palletising roll products. STAKKERS® are fully recyclable and made from environmentally sound materials.

Key product features/benefits:

- Reduce transport and storage costs - Increases pallet storage potential compared to pyramid stacking by up to 60%
- Saves space. Allows for pallets to be double or triple stacked
- Allows unpacking of pallets without fear of product rolling or falling off
- Reduces product damage significantly

Application/Uses:

- Flexographic printers
- Film convertors
- Fabric manufacturers
- Tape manufacturers
- Anyone who has rolls of material

Instapak

Instapak® foam is a professional, clean and light weight packaging material to cushion products during transportation and storage. To use, just apply pressure to the 'press here' panel on the foam bags and gently pat to activate the expanding foam. Place the expanding foam filled bag in the shipping or cardboard box and nestle the product into the foam cushion. As the foam sets, it moulds around the product providing an exact foam packaging fit.

Key product features/benefits:

- Highly effective
- Professional look gives a good impression of your product
- Space saving
- Fits exactly to your product or product mix

Void Fill

Our range of packaging air pillows are designed to ensure a high level of product protection through transit and storage life. Air pillows provide a reliable cushioning for your products; the light weight nature of the air pillows reduce transportation and shipping costs. Due to the fact air pillows are inflated on demand they require a lot less storage space than conventional cushioning products. Air pillows come in standard sizes but can be produced to an exact specification. These are to be used in conjunction with our Air Systems.

Key product features/benefits:

- Lightweight – keeping shipping cost down
- Inflated on demand so minimal storage space required
- Excellent cushioning properties

Application/Uses:

- Void filling cartons when a product does not quite fit
- Providing cushioning for items during transit

Fill-Air® Rocket™ range

The Fill-Air® Rocket™ is an on-demand inflatable void-fill system machine that can produce 100 feet of lightweight void fill material air pillow cushions per minute.

Mail Tuff™/polythene mailers range

Polythene mailing bags are an excellent protective choice for non-fragile items, pamphlets and magazines. Lightweight and tear-resistant, polythene mailers are widely preferred to conventional paper envelopes. Available in custom sizes and with your own print/logo, PPE stamp and different levels of security.

Key product features/benefits:

- Security
- Tear resistant
- Wide range of sizes
- Waterproof
- Resistant to punctures and tearing

Cardboard Boxes

How do I choose a box?

Choosing the most suitable cardboard box for your requirements can appear to be a daunting task! The below information and following pages will demonstrate some of the options available to you. Do not hesitate to give us a call or email to speak to our technical sales team for assistance or advice.

Measuring a box

All box measurements are based on the internal dimensions. We need to know the Length (L), Width (W) and Height (H) of the box in millimetres (mm) to ensure your boxes are made to the correct size.

Choosing a box style

Boxes come in many styles and usually carry a style code, for example '0201'. These style codes are called 'FEFCO' styles. We split our FEFCO styles into 'Standard Boxes' and 'Die Cut Boxes'. We can however also create completely bespoke designs too!

Single wall or double wall

The walls of a cardboard box come in a variety of thicknesses: single wall, double wall and triple wall. A thicker wall increases the strength and protection offered by a box. Our technical sales team will recommend a wall thickness based on the weight of your products.

Plain, printed or with fitments

As standard we offer our boxes in plain brown or white. We also offer the option to have your boxes printed with a variety of different print options (see page 45). If you need a fitment inside your box to hold your product(s) we can create these too (see page 44).

Standard boxes range

Standard box styles manufactured to any size

Standard cardboard boxes come in a range of styles with the '0201' style being universally the most popular manufactured box of all time. Standard box styles are cost effective, quick to manufacture and can be produced to any size or quantity.

Key product features/benefits:

- Cost effective
- Wide range of styles
- Any size or quantity
- Versatile
- Fast turnaround

100% RECYCLABLE

Pallet Box

Die cut boxes range

Boxes for more complex packaging

Die cut boxes are the solution to more complex packaging problems which can't be solved with a standard box. They are manufactured by being stamped out of corrugated board so more complex designs can be created. For example, certain types of die cut box can eliminate the need for tape to seal a box by creating interlocking flaps, resulting in a better first impression to your customer.

Key product features/benefits:

- Aesthetically pleasing
- Wide range of styles
- Any size or quantity
- Easy to construct
- Less tape for sealing

Cardboard Boxes

Bespoke designs and fitments range

Precise packaging for your products

Bespoke designs and fitments are ideal to maximise product yield per box and eliminate unnecessary space to maximise the efficiency of transporting goods. Box fitments can be made from corrugated, foam or more unique solutions such as Korrvu® suspension / retention packaging. Reusable options are also available to reduce packaging waste.

Key product features/benefits:

- Aesthetically pleasing
- Reduce transport costs
- Precise fitment
- Maximise space
- Reusable options

Printed boxes range

Give a better first impression

Printed boxes are great for retail ready packaging, stock identification purposes or to increase brand awareness.
Newtown can supply boxes printed using a number of different print processes to suit your requirements.

The three different types of print we offer are:

Litho (offset) Print:
Litho print offers the best quality print with photographic printing results. Great for high end retail packaging for products such as electronics, cosmetics and food boxes. Litho print is best for high volume production runs to achieve optimum pricing.

Digital Print:
Digital print offers great quality (similar to Litho), making it again suitable for high end retail packaging. Digital print is more cost effective than Litho print in smaller quantities and requires minimum or zero tooling fees.

Flexo Print:
Flexo print has a much lower quality print compared to Litho and Digital. It is best suited for larger runs with simple designs of 3 colours or less due to photographic results being much harder to achieve.

What is the best print for you? (quick reference)

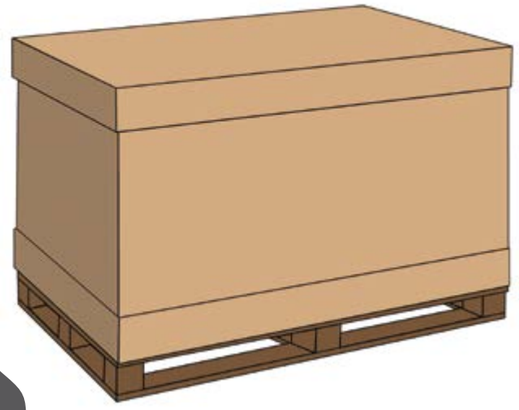
Printing Type	Litho	Flexo	Digital
Large quantity	✓	✓	
Lower quantity			✓
Smaller budget			✓
Photographic quality	✓		✓
3 colours or less		✓	

Application/Uses:

- Great advertisement
- A range of colours available
- Lots of styles
- Bespoke to you

Pallet Boxes

Cardboard pallet boxes are ideal for exporting products as they are very strong and durable. They are available with or without wooden pallets and are in compliance with ISPM15 regulations. They are strong enough to stack and can be securely closed with strapping. Cardboard pallet boxes are supplied flat packed and can be reused to save you time, space and money.



Key product features/benefits:

- Saves space
- Economical
- Reusable
- Collapsible

"Bespoke sizes can be made to order, call or contact us now"

Application/Uses:

- Exporting goods
- Can be used for storage

Bespoke Packing Station

newtown
The Packaging Experts

Our bespoke stations provide packaging solutions for your business. All our stations are custom made to meet the demands of our clients. Made from strong and durable steel construction, these stations are built to last.

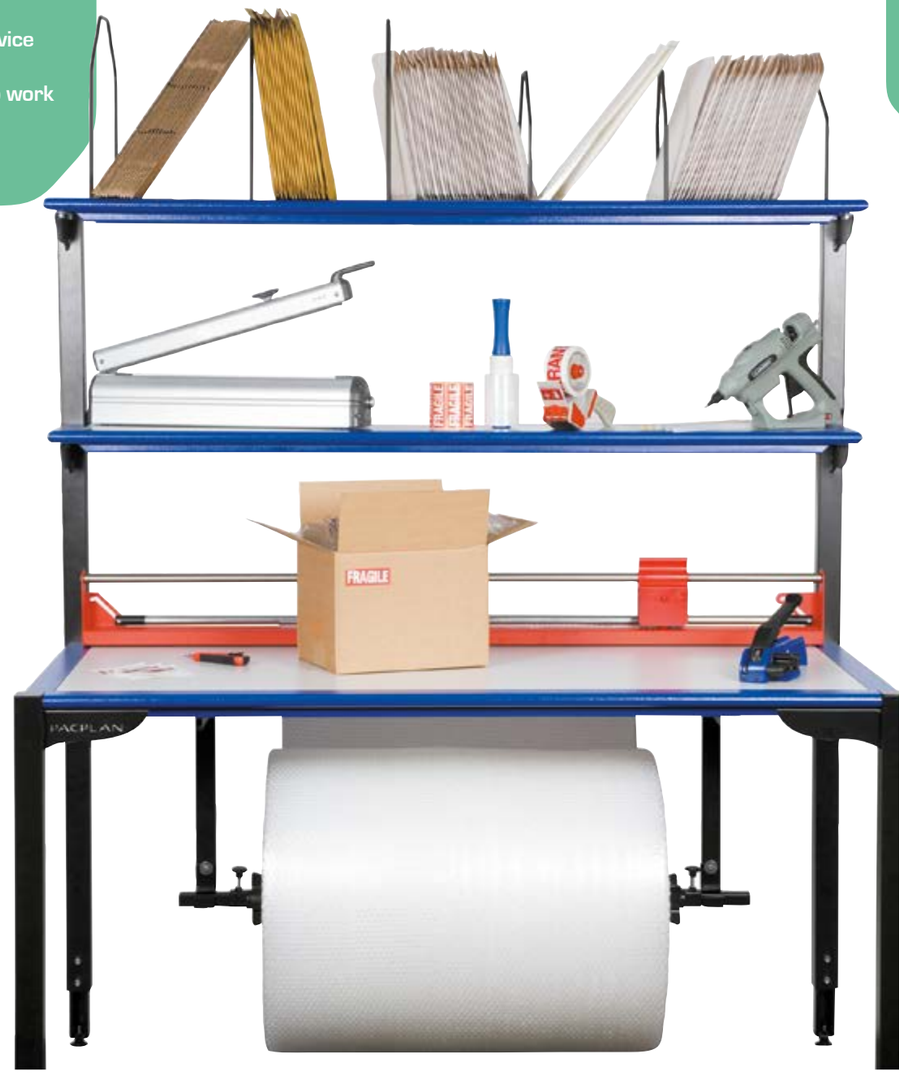
A wide range of customisations are available including conveyors, dispensers, rubber countertops and much more.

Steps to order:

1) Ring us to schedule an onsite consultation.
2) Provide our rep with information of your packing station needs.
3) Sit back and relax. We will create a CAD design based off your requirements.

Key product features/benefits:

- Free CAD design service
- 1 Year industry warranty
- Rapid installation service
- Enables employees to work more efficiently



Application/Uses:

- E-Commerce enterprises
- Automotive production line
- Mail order businesses

"We can manufacture all polythene products in bespoke sizes too"

Lay flat tubing is a continuous tube of polythene supplied on a roll. It can be cut and sealed at each end to create a secure bag protecting all around your products. Available in various widths from 1" to 48" (25mm to 1200mm) giving you a good choice of sizes to fit your products. There are different thicknesses to choose from; 120g to 1000g (30mu to 250mu.) The two standard options are 250 gauge and 500 gauge.

Grip Seal Bags

Our grip seal bags are strong clear polythene and re-usable ideal for protecting your products against dirt and moisture. The sealing remains firmly shut when closed but easily opens and closes again. We have an extensive range of sizes available also available in plain or with write on panels allowing you to identify the products easily.

Application/Uses:

- Packing products for transit
- Protecting products from dirt and moisture

Strapping

Polyester strapping is used in the same way as PP strapping but has many advantages. It is as strong as steel but a lot safer to work with; it is non-corrosive so will not leave unsightly stains on your products and packaging. It is specifically designed for palletising and bundling products.

Key product features/benefits:

- Strong as steel
- Non-corrosive
- Variety of widths and breaking strains for various applications
- Safer than steel banding

Seals on page 65

Application/Uses:

- Strapping heavy goods onto pallets
- Protecting heavy bundles or packages

> *"All the strength of steel banding without the negative features"*

ISTA Testing / Stakker

Packaging design & ISTA® testing

Newtown can provide you with proven packaging solutions that are designed around you. For nearly 40 years we have provided solutions and value analysis for clients to indentify the most cost effective way to protect your products.

ISTA® testing

If required we can also submit our solution to be tested to ISTA® (International Safe Transit Association) guidelines, which will ensure that in standard conditions your product will arrive in pristine condition.

Packaging analysis

It is a good idea to consider a packaging analysis if you are experiencing customer complaints due to damaged goods or are using a supplier who has a 'we've always done it this way' mentality. It is also worth considering even if you have been through a tender process, as often the packaging item cost does not translate into pack costs benefits.

STAKKER® roll securing product range

STAKKERS® are a new way to maximise the safety and efficiency for palletising roll products. STAKKERS® are fully recyclable and made from environmentally sound materials.

Key product features/benefits:

- Reduce transport and storage costs - Increases pallet storage potential compared to pyramid stacking by up to 60%
- Saves space. Allows for pallets to be double or triple stacked
- Allows unpacking of pallets without fear of product rolling or falling off
- Reduces product damage significantly

Application/Uses:

- Flexographic printers
- Film convertors
- Fabric manufacturers
- Tape manufacturers
- Anyone who has rolls of material

Instapak

Instapak® foam is a professional, clean and light weight packaging material to cushion products during transportation and storage. To use, just apply pressure to the 'press here' panel on the foam bags and gently pat to activate the expanding foam. Place the expanding foam filled bag in the shipping or cardboard box and nestle the product into the foam cushion. As the foam sets, it moulds around the product providing an exact foam packaging fit.

Key product features/benefits:

- Highly effective
- Professional look gives a good impression of your product
- Space saving
- Fits exactly to your product or product mix

Wooden Crates

newtown
The Packaging Experts

Wooden crates and cases are suitable for sea freight shipments of heavy equipment / products. They can also be lined with various materials such as foam for extra protection. The difference between a crate and a case is that a case in boarded to all sides, whilst a crate is open boarded.

All crates and cases are made to order.

Pallets range

Pallets can be supplied four-way entry or two-way entry in a variety of different grades (new or used).

Steel Banding

newtown
The Packaging Experts

Steel banding is available as ribbon wound or mill wound. It is a heavy duty strapping product. Ribbon wound means each layer is wound on top of the layer below, like packaging tape. This makes the width of the strapping the same as the width of the coil. Mill wound means that steel banding is oscillated uniformly and tightly across the 63.5mm width of the core, like a cotton reel.

Application/Uses:

- Banding of wooden cases, palletised loads, demanding industrial jobs and heavy machinery

Steel banding range

STOCK CODE	DESCRIPTION	UNIT OF SALE	MIN. ORDER QTY
Ribbon Wound Steel Banding			
NP5196.11–00	13mm x 401m (0.5mm) 17.5 Kg Coil	Coil	1 Coil

Extractor Bags & Sacks

Strong polythene sacks for dust extraction or collecting sawdust/wood chippings.

STOCK CODE: NP9050.10–06
SIZE: 1016mm x 1500mm (500g)
UNIT QTY: 1 Pack (50 Sacks)

Refuse Sacks

STOCK CODE: NP9009.02–00
SIZE: 18" x 29" (180g)
UNIT QTY: 1 Pack (200 Sacks)

(Different sizes and lengths available)

Tack Rags

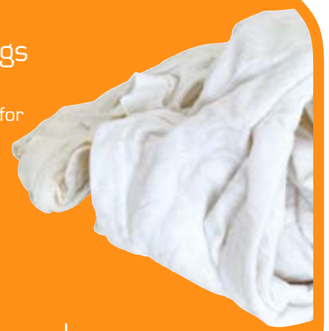
To remove dust and dirt from surfaces to be painted, coated or laminated.

STOCK CODE: NP4118.00–00
UNIT QTY: 1 Pack

STOCK CODE: NP4119.00–00
UNIT QTY: Individually Wrapped

Towel Rags

High absorbency for heavy cleaning tasks and spillages.



STOCK CODE: NP4190.00–01
SIZE: 8kg Roller Pack

STOCK CODE: NP4199.00–20
Size: 230mm x 400mm

Toilet Rolls

STOCK CODE: NP4010.00–00
SIZE: 110mm x 40m

STOCK CODE: NP4019.50–21
SIZE: 95mm Dia x 58mm x 150mm

(Different sizes and lengths available)

Centre Feed Rolls

STOCK CODE: NP4048.00–48
SIZE: 195mm x 180m White

STOCK CODE: NP3628.03–70
SIZE: 280mm x 370m White

(Different sizes and lengths available) * Colour may vary

Gloves

Blue Nitrile Gloves Size Medium

STOCK CODE: NS41131.1
UNIT QTY: 1 Pack (100 Gloves)

Blue Nitrile Gloves Size Large

STOCK CODE: NS40977.7
UNIT QTY: 1 Pack (100 Gloves)

Flock Nitryl Gloves

STOCK CODE: NP4040.09–09
UNIT QTY: 1 Pair

Other specifications are available - please ask.

Tiger Paws Size 9

STOCK CODE: NP4040.00–09
UNIT QTY: 1 Pair

Other specifications are available - please ask.

Cotton Chrome Medium Gloves

STOCK CODE: NP4040.00–30
UNIT QTY: 1 Pair

Other specifications are available - please ask.

Nylon Lightweight Gloves

Size 7 Gloves

STOCK CODE: NS40538.6
UNIT QTY: 1 Pack (10 Gloves)

Size 8 Gloves

STOCK CODE: NS40977.1
UNIT QTY: 1 Pack (10 Gloves)

Size 9 Gloves

STOCK CODE: NS40977.2
UNIT QTY: 1 Pack (10 Gloves)

Ancillary, Janitorial & PPE

FFP1 Face Mask

STOCK CODE: NS40977.3
UNIT QTY: Pack of 10

Hand Sanitizer 300ml Pump

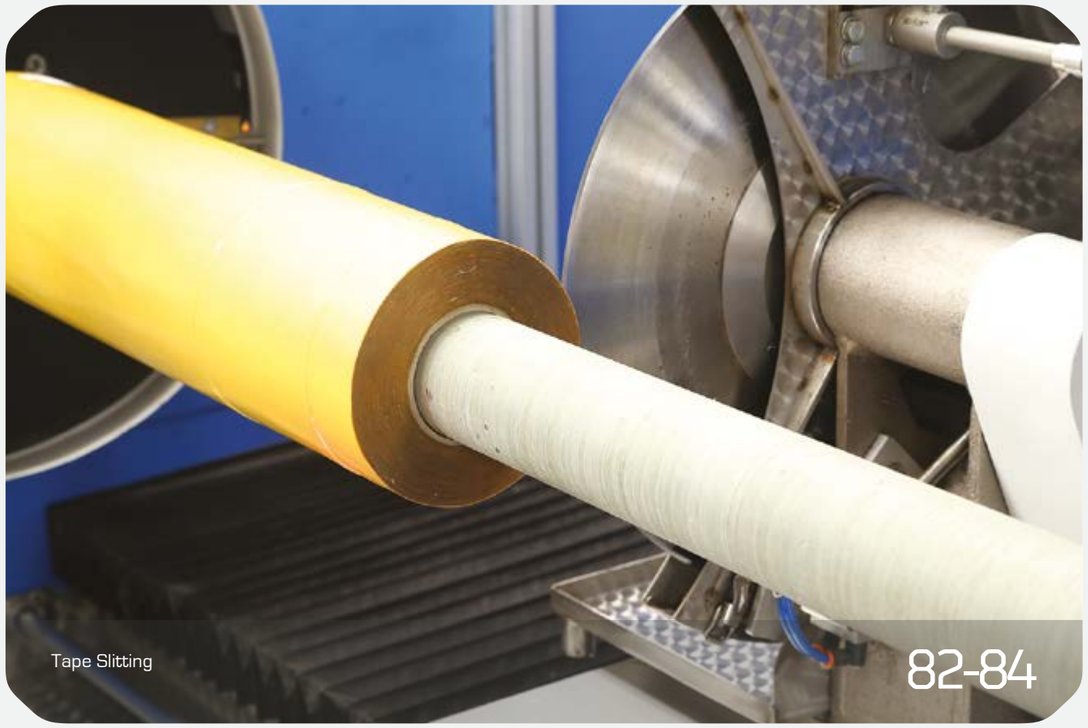
STOCK CODE: NS40979.1
UNIT QTY: 12

Chemical Spill & Go Kit

STOCK CODE: NS40982.1
UNIT QTY: 1 Kit

6 How We Do it

- Tape Slitting 82-84
- Advice & Support 85



Tape Slitting

We have over 15 years experience in conversion of tapes. With our state of the art facilities we can provide tapes to your exact measurements. Our most popular method is tape slitting; we cut the tape from a master 'log' roll to the width you require. We are able to slit tapes as narrow as 3mm and up to 1600mm wide (the usual maximum log width).

The advantage of slitting is that we can provide you with a size of tape even if we don't normally stock it. However, more importantly you can have the exact size required for your purpose and you are not paying for tape you do not need.

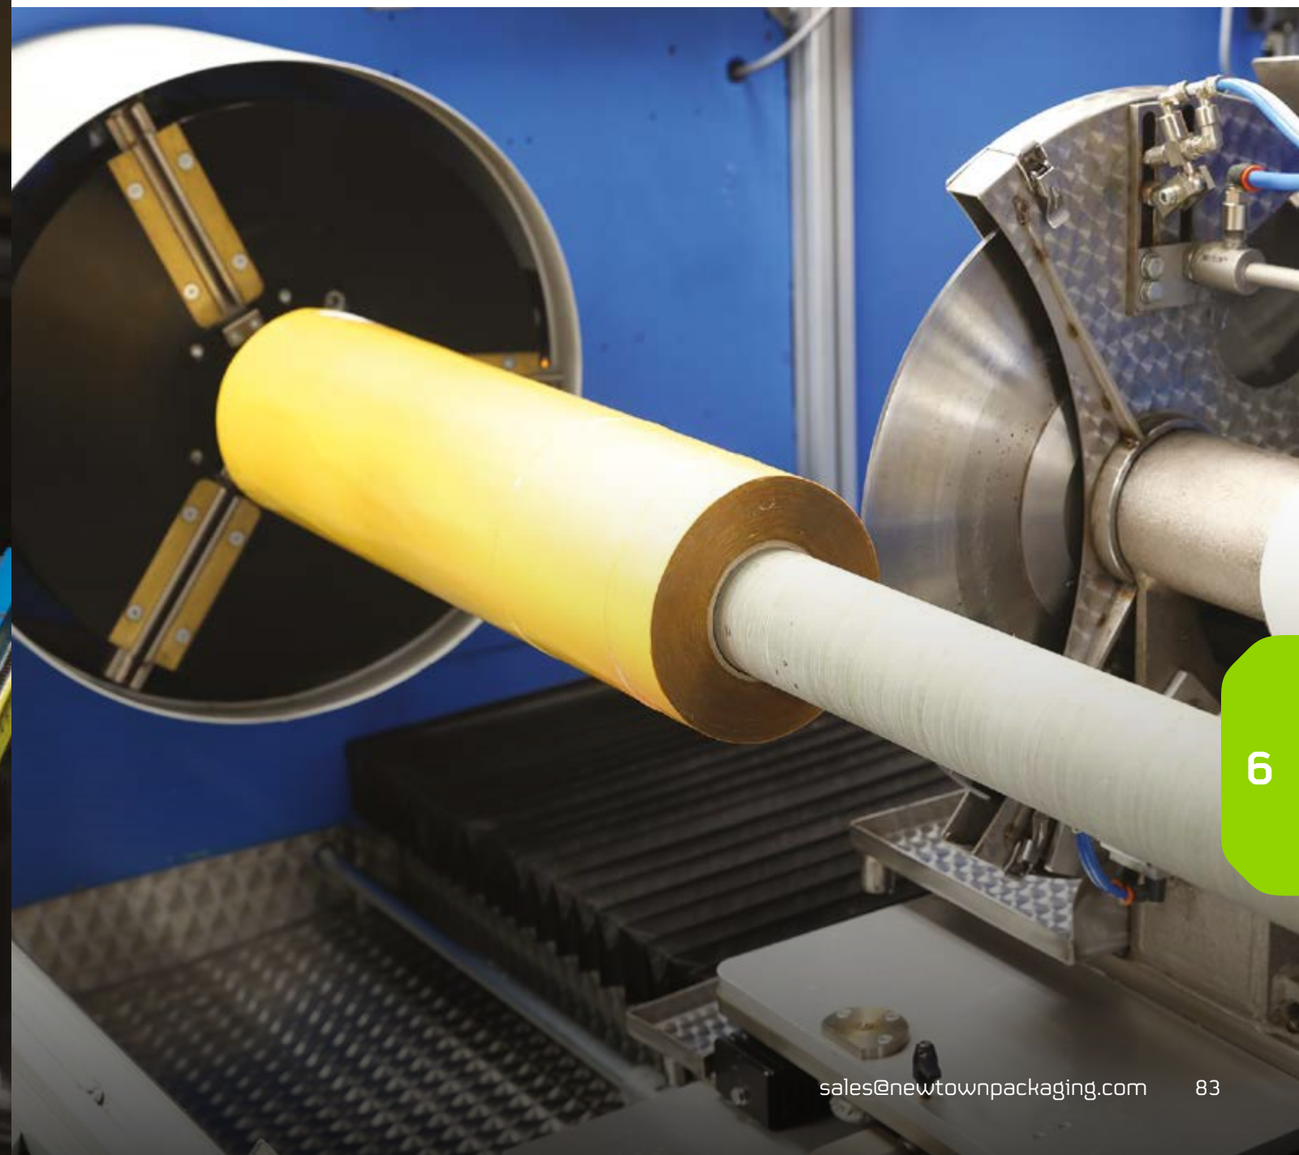
Application/Uses:

- Tapes cut to size are common in the fabrication of metal components, powder coating industry, point of sale/print industry and automotive industry.

newtown
The Packaging Experts

Key product features/benefits:

- A wider range of choice
- Pay for what you need, not just what is standard - save money
- Get a product to fit - save time
- Quick turnaround, our flexible service helps you to react to your customer needs



6

Tape Die Cutting

By die cutting your product we can create a bespoke bonding product to meet your individual needs. Whether that is a specific width, length or a completely unique design, the possibilities are endless. Die cut designs can include holes, oversized liners for ease of application and complimentary products can be incorporated. For example, your tape could be laminated onto foam or other materials.

Key product features/benefits:

- Fast and easy application
- No waste
- Reduced labour costs
- Professional solution

Application/Uses:

- Die cut adhesives are used in an extensive range of products, this includes: mobile phones, electronics, automotive fitments, signs, and badges. Benefit from a custom made die cut shape to improve your bonding accuracy and application speed, therefore reducing labour costs.

Advice & Support

newtown
The Packaging Experts

Strategic review

Are you using the correct product for the right application?

With having over 40 years experience within the packaging industry, we have a great deal of expertise on hand to help you make the right choice. Our Sales Team is trained to listen and understand the needs of our clients. We understand your objectives and can provide a review of your current operations and suggest improvements.

Call us today on 01527 517 517 to arrange an appointment!

Waste review

If you are a large consumer of packaging materials you will be paying a substantial amount of tax on waste. We can conduct a review of your usage and suggest more environmentally friendly or light product alternatives to decrease your tax bill.

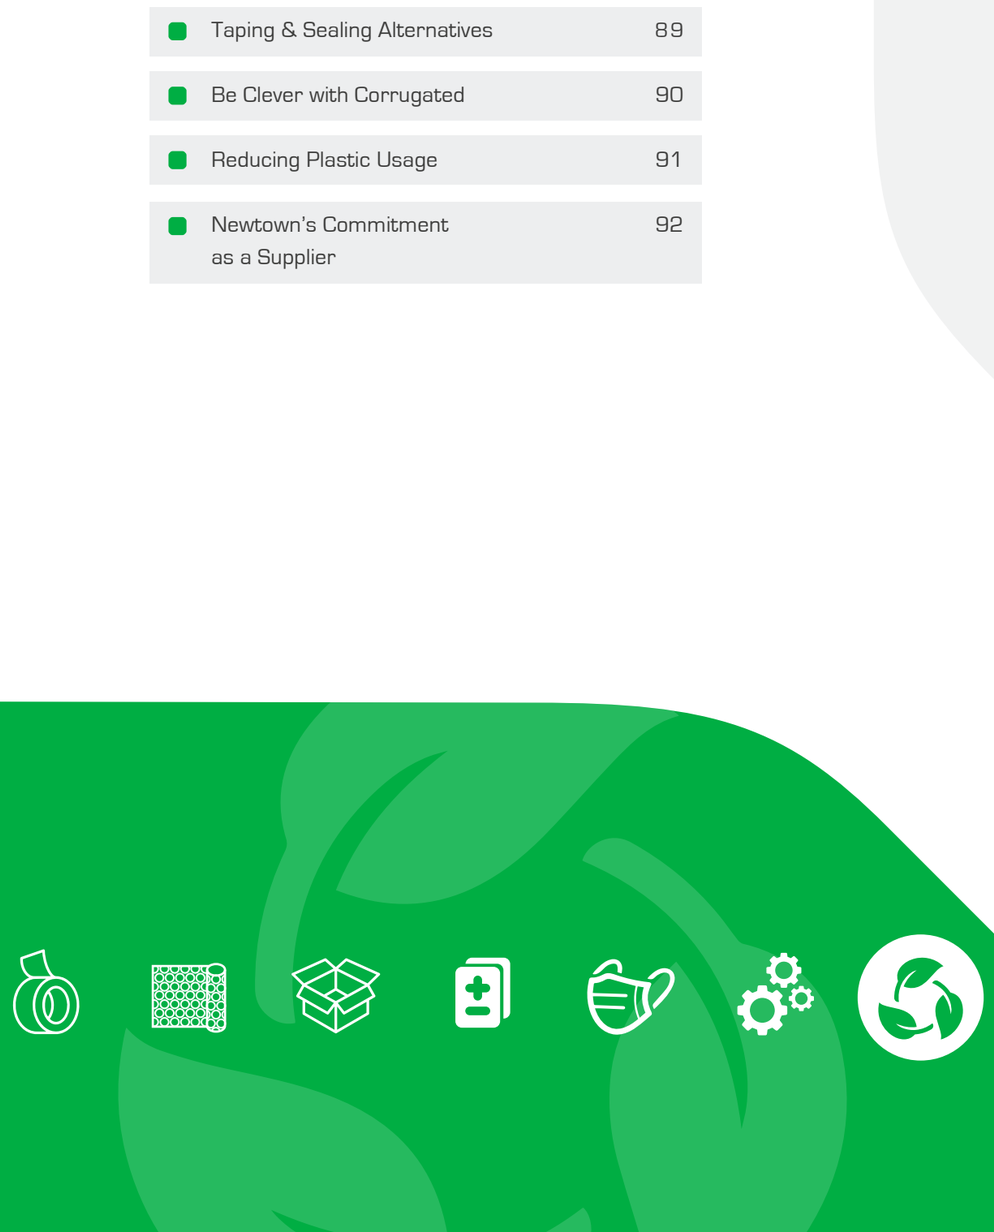
Key product features/benefits:

- **Save money**
- **Improve your environmental footprint**

"Our experienced technical sales representatives are on hand to specify the right product for your application"

7 Environmentally Responsible Packaging

- Intro & Why Sustainable Packaging? 88
- Taping & Sealing Alternatives 89
- Be Clever with Corrugated 90
- Reducing Plastic Usage 91
- Newtown's Commitment as a Supplier 92



Intro & Why Sustainable Packaging?

Supporting your business with responsible packaging

Recent media coverage has highlighted the severe problem of global plastic pollution, with single-use plastic being the core focus of the debate. Everyone needs to reduce their environmental impact on the planet, both personally and commercially. Newtown has made a commitment to educate and support its customers with information, recommendations and greener packaging products to help sustain our planet.

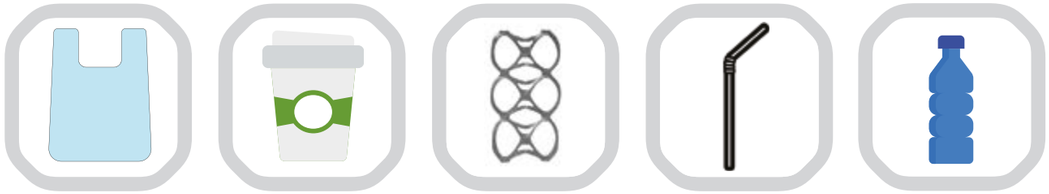
The Major Culprits

The packaging industry has faced criticism in the past for contributing to the on-going global waste problem. Newtown wants to be part of the solution by educating and assisting businesses to use greener packaging products. We believe it is important for our customers to have an understanding of the effects waste pollution is having on our planet.

Are you aware of the effects that waste pollution is having on our planet? Here are some of the brutal facts as to why it's important we all do our bit to eliminate this *epidemic*.

The 'Big Five' Offenders

With single-use plastic being a hot topic, to get an understanding of why plastics are clogging up our oceans, below demonstrates the 'Big Five' offenders. Whilst many of these products are not directly thought as 'industrial packaging', many of the materials used in these products are also used in other types of packaging. Below demonstrates the amount of time each of these 'day to day' items take to decompose. By choosing greener packaging you will be doing your bit to reduce the global waste issue.



20 YEARS | 50 YEARS | 200 YEARS | 450 YEARS | 450 YEARS

Is Your Business Compliant?

As a business do you know that you have a responsibility as a producer of packaging waste. There is something called the 'The Producer Responsibility Obligations (Packaging Waste) Regulations 2007' which originally came into effect in 1997 in Great Britain and Northern Ireland. The Packaging Waste Regulations enforce producers of packaging to take responsibility for their environmental impact. The regulations require obligated producers to pay a proportion of the cost of the recovery and recycling of their packaging.

Your business falls under the legislation if:

- **You are a business operating in the UK**
- **Have a turnover of £2 million or more**
- **Handle more than 50 tonnes of packaging**

Taping & Sealing Alternatives

newtown
The Packaging Experts

Do you currently secure your cardboard boxes with traditional plastic based packaging tapes? Plastic based packaging tapes need to be separated from corrugated waste before recycling and take many years to biodegrade. See the below tips and alternatives to help you be greener.

Gummed Paper Tape

Gummed paper tape is an environmentally friendly option for sealing cardboard boxes. The adhesive backing needs to be water activated before application using an electronic dispenser. It offers a number of benefits over traditional plastic based packaging tapes:

- 100% sustainable, biodegradable and recyclable
- No need to remove from a box before recycling
- Provides a stronger and tamper evident seal to your box
- Available printed with your company logo or message
- Can be applied faster than traditional packaging with electronic dispenser

Self Adhesive Paper Tape

Self adhesive paper tape requires no wetting before application, it is ready to use off the roll due to its high strength adhesive backing. A great alternative to traditional packaging tapes with all the environmental benefits.

- 100% sustainable, biodegradable and recyclable
- No need to remove from a box before recycling
- Does not require 'wetting' before application
- Available printed with your company logo or message

N-Tape

Whilst not as green as gummed paper or self adhesive paper, N-Tape is still a great cost effective alternative to reduce packaging waste. N-Tape is similar to traditional packaging tapes but is supplied on double length 150m rolls of tape. The benefits include:

- Twice the amount of tape on a roll results in less cardboard core waste
- Takes up less storage space so reduces CO2 transport emissions
- More cost effective than traditional packaging tapes

7

Be Clever with Corrugated

Corrugated cardboard is the most recycled packaging material. Over 84% of all corrugated cardboard is recycled in the UK – that adds up to about 2 million tonnes of waste saved from landfill every year. Despite being such a recyclable material, here are some great tips to reduce your corrugated usage.

Use the Correct Sized Box

Using a box that is the correct size for your product(s) requires less cardboard and means you'll use less void fill inside the box when packing your items. Newtown manufactures boxes to the exact size you require in any size, quantity or grade.

- Using exact sized boxes reduces your packaging waste
- Reduce costs by not paying for more cardboard than is required
- Sustainable, biodegradable and recyclable

Stronger Boxes with Less Material

When specifying the strength of a box, most suppliers will ask if you want single wall or double wall. Newtown now offers boxes in cardboard grades that are as strong as double wall but look like single. This means you can have boxes manufactured that use less material but still offer the same strength.

- Reduces your packaging waste
- Saves you money as you're paying for less material
- Single wall boxes that are just as strong as double wall

Reuse Your Corrugated Waste

Cardboard shredders are great way to make light work of turning corrugated packaging waste into free and useful packaging material. Shredded cardboard can be used to replace void fill such as bubble wrap, air pillows and polystyrene chips.

- Create free packaging from cardboard waste
- Reduce costs by reusing waste material
- Replace plastic based void fill such as bubble wrap
- 100% sustainable, biodegradable and recyclable

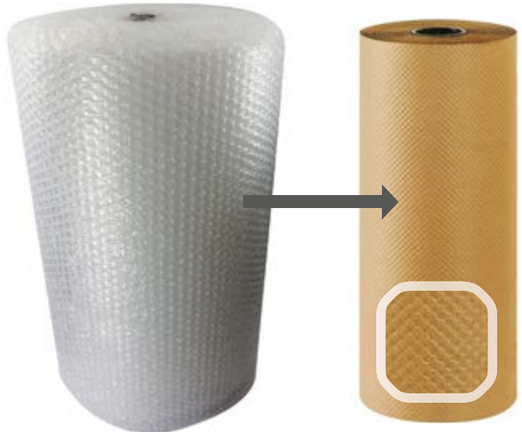
Reducing Plastic Usage

The majority of plastic waste does not get reused or recycled and experts believe that 50% of plastic is single-use, meaning it is used once before being discarded. Reducing plastic packaging will help minimise this wasteful impact on our planet.

Paper Bubble Wrap

Paper bubble wrap is an environmentally friendly alternative to traditional bubble wrap, the paper is made from 100% recycled material and is biodegradable. Due to its absorbent properties this paper alternative still offers high impact protection against harmful external factors when transporting your products.

- 100% sustainable, biodegradable and recyclable
- High impact protection
- 100% plastic free



Corrugated Paper Envelopes

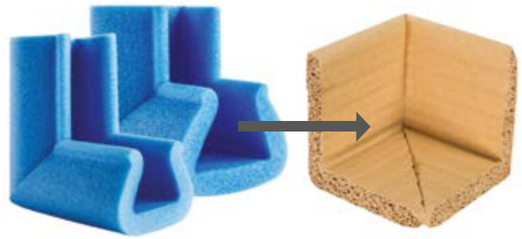
Corrugated paper envelopes are a 100% recyclable alternative to traditional bubble bags. They have a fluted corrugated interior instead of a plastic based bubble wrap lining.

- 100% sustainable, biodegradable and recyclable
- Same strength and protection as traditional bubble bags
- Available plain or printed
- 100% plastic free

Corrupad® Profiles

Corrupad® is made from 100% post consumer waste, a great alternative to traditional foam profiles. This gives strength, resilience and shock absorbency.

- 100% sustainable, biodegradable and recyclable
- High impact protection
- 100% plastic free



Newtown's Commitment as a Supplier

Paper Bags

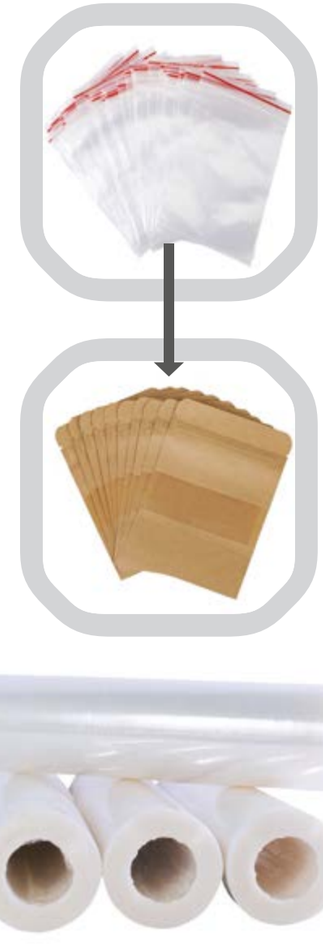
Traditional polythene bags are typically a single use packaging product that goes in the bin once it reaches the end user. Paper bags are a 100% biodegradable and recyclable alternative to reduce the impact of single use bags.

- 100% sustainable, biodegradable and recyclable
- Same strength and protection as traditional polythene bags
- Available plain or printed

Engineered Stretch Films

Wrap more with less, we have new stretch film technologies that will reduce the amount of polythene required for wrapping your pallets. This means you will use up to 60% less polyethene and wrap more pallets with less material.

- Reduce stretch film usage by up to 60%
- Wrap more pallets with less material
- Reduce your costs and packaging waste taxes



Commitment as a Supplier

Our plans for 2021/22

- Actively inform clients of products that have positive environmental benefits
- Work towards BSI ISO 14001
- Staff training towards environmental best practice
- Reduce Co2 of vehicle fleet
- Reduce miles travelled for meetings by increasing virtual meetings
